

Aquafold™

Hydrophilic Acrylic
Foldable IOLs

Material	Hydrophilic Poly Hema, 25% Water Content, Flexible, Biocompatible
Manufacture	Lathe cut, Tumble Polished
Model No.	CBF52 UVA/ CBF65 UVA
Optic Style	Essel Curves (1.1°) (axis)
Optic Size	6.00/ 5.75mm. Diameter
Diameter	12.5mm Diameter
Haptic style	Modified C-Loop, 0 Angulation
A. Constant	119.2
Dispersers	-5.00 to +30.00
Refractive Index	1.4626, Hydrated, UV Absorbing

- Advanced Material Having Low Water Content
- Superior Optical Features
- Square Edge Optics to reduce the chance of PCO
- No Calcium Deposition, outstanding bio-compatibility
- Extremely Tear Resistant
- Vag Resistant
- Two – Step quality control of the dispoic: power during manufacturing
- Manufactured as per FDA Guidelines
- Available from BENE FLEX-26 material
